Big Backyard BioBlitz

Calling all nature lovers!

Join thousands of people across Canada in documenting the nature around you to help protect endangered species.

Just grab your smartphone, tablet or camera and document the plants, animals and other cool creatures around you. Your observations can help scientists protect endangered species and remove invasive ones.

Explore solo or bring your family and friends along. Whether you're a first-timer or a bioblitz pro, you'll be amazed at what you'll discover!
